Re: NPDES Discharge for Stormwater Construction Activities
Schuylkill River Trail Extension – South Street to Christian Street
Permit No. PAI015114007
City of Philadelphia
Philadelphia County

Dear Mr. Bumb:

Enclosed is the above-referenced permit which authorizes the discharge of stormwater from the construction activity described in the final erosion and sedimentation control plan and the permit application. The plan must be fully implemented and available at the construction site. Failure to do so may result in suspension of your permit.

Please read carefully Parts A, B, and C of the permit which detail the terms and conditions of this authorization. Philadelphia Water Department staff and/or representatives of the Department of Environmental Protection may inspect this earthmoving activity to determine compliance with applicable permit requirements, Chapters 92, 101, and 102 Rules and Regulations and the Clean Streams Law.

Permit requirements and federal regulations at 40 CFR Section 122.21(b) require "when a facility or activity is owned by one person but is operated by another person, it is the operator's duty to obtain a permit." Please be advised that once a contractor has been selected for the project, the permit must either be transferred to the contractor or the contractor must be made a co-permittee. The enclosed form must be used to add a co-permittee.

Enclosed is a Notice of Termination form to complete and file when construction activities have ceased and final stabilization has been achieved.

This authorization does not relieve the applicant from applying for and obtaining any and all additional permits or approvals from local, state, or federal agencies for the construction activity.

If you have any questions, please contact me.

Sincerely,

Domenic Rocco, P.E.
Regional Manager
Waterways and Wetlands
